Instructional Bass Guide Services

Techniques

Keith, a top bass tournament professional, with years of experience has learned and teaches techniques gained from across the United States. He is willing to share these experiences with you in depth. This includes the proper selection of rods, reels and line.

Learning how to rig and fish a plastic worm, which is applicable anywhere bass are found, is just one of the many techniques he can and will teach you. Included in these techniques are the deadly "Split Shot" and "Drop Shot" methods. And the time tested "Texas" and "Carolina Rig." His expertise also includes the "Jig and Pig", which can be fished as many ways as the plastic worm.

He will also school you on the art of top water fishing. Which includes lure selection, color, size and when to fish them. Top water techniques include "Poppers", Buzz baits, "Walking the Dog" and twitching Rapalas.

Other topics taught in-depth are crank baits, spinner baits, spoons, swimming baits and the very productive techniques of "Pitching and Flipping".

Fishing Patterns

During your guide trip with Keith, he will explain bass habits and bass habitat to you in depth. You will come away with a much better understanding of how and why the seasons of the year and the surrounding environment effects bass behavior. Included in this area are the food chain, shelter, temperature and pH levels. A firm understanding of the aforementioned will enable you produce a pattern you can develop to catch more bass consistently.

Keith's vast experience enables him to answer any and all questions you may have about developing patterns.

Sonar Technology

Keith is well qualified in the area of sonar. For example: He will teach you the difference between a "Depth Finder" and a "Fish Finder".

He will teach you how to read a topographical map and how to interpret the map's legend using a "Flasher", "Paper Graph" and the popular new "LCD" sonar Units.

Keith will teach you the proper settings for the mode of operation of a sonar unit. Also, if you're planning to purchase a sonar unit he can assist you in your decision as to what type of unit fits your needs. This also includes GPS.

Environmental

With more and more research going into the study of bass and how they relate to their environment it is an absolute "must" that all successful bass fisherman keep up with the latest findings

Keith does this! In fact, it is one of his major concerns. So much so that Keith was recognized for his efforts in this area, which led to his appointment to serve on the California Warm Water Fisheries Board as Chairman of Angler Education.

B.A.S.S. Tournament Professional.

Mark Seaters
"Catching trophy fish or big fish, call Keith."

Rick & Claudia Hamilton
"Keith made our day fun and the best bass fishing we ever had."

Brian Buckman
"Two of the many fish caught and released that day."

Pat Murphy
"I learned new techniques and caught a 9+ fish, call Keith Clow."
